4. FIRST AID MEASURES

Description of first aid measures

General advice	Contains petroleum distillate. Harmful or fatal if swallowed. Vapor harmful. May affect the brain or central nervous system causing dizziness, headache, or nausea. Reports have associated repeated and prolonged occupational exposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal.		
Eye contact	In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.		
Skin contact	Wash thoroughly with soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing before reuse. In the case of skin irritation or allergic reactions see a physician.		
Inhalation	Move to fresh air in case of accidental inhalation of vapors. If continued difficulty with breathing is experienced, get medical attention immediately.		
Ingestion	Not an expected route of exposure. If swallowed, do not induce vomiting. Get medical attention immediately.		
Self-protection of the first aider	First aider: Pay attention to self-protection!.		
Most important symptoms and effects, both acute and delayed			
Symptoms	May cause skin irritation. May cause eye irritation.		
Indication of any immediate medical attention and special treatment needed			
Note to physicians	Treat symptomatically.		
5 FIRE-FIGHTING MEASURES			

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Dry chemical. Carbon dioxide (CO2). Sand. Use foam or water FOG as a last resort.

Unsuitable extinguishing media Do not use a solid water stream as it may scatter and spread fire.

Specific hazards arising from the chemical

No information available.

Hazardous combustion products Thermal decomposition (burning) may release irritating, corrosive and/or toxic gases, vapors and fumes.

Explosion data Sensitivity to Mechanical Impact Not sensitive. Sensitivity to Static Discharge May be ignited by heat, sparks or flames.

Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal precautions	No action should be taken involving any personal risk or without suitable training. Use personal protective equipment as required.		
Other Information	Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area).		
For emergency responders	Use personal protection recommended in Section 8.		
Environmental precautions			
Environmental precautions Avoid release to the environment. Prevent further leakage or spillage if safe to do Prevent product from entering sewers, drains, or waterways. Local authorities sho advised if significant spillages can not be contained. See Section 12 for additional ecological information.			
Methods and material for containm	ent and cleaning up		
Methods for containment	Contain spillage with non-combustible absorbent material, e.g. sand, earth, diatomaceous earth, vermiculite.		
Methods for cleaning up	Pick up the absorbed material (described just above) and transfer to properly labeled containers for disposal according to local / national regulations (see Section 13).		
Prevention of secondary hazards	Clean contaminated objects and areas thoroughly observing environmental regulations.		
	7. HANDLING AND STORAGE		
Precautions for safe handling			
Advice on safe handling	Use personal protective equipment as required. Remove all sources of ignition. Use only outdoors. All equipment used when handling the product must be grounded.		
Conditions for safe storage, including any incompatibilities			
Storage Conditions	Keep containers tightly closed in a cool, dry, well-ventilated place. Keep away from heat, sparks, flame and other sources of ignition. Use spark-proof tools and explosion-proof equipment.		
Incompatible materials	Strong acids. Strong oxidizing agents.		

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Appropriate engineering controls

Engineering Controls	Use natural cross ventilation, local (mechanical) pick-up, and/or general area mechanical cross ventilation. Ventilation pattern should be designed to prevent accumulation of solver vapors. Ventilation must be sufficient to maintain solvent vapor concentrations below the TWA limits outlined above.	
Individual protection measures, su	ch as personal protective equipment	
Eye/face protection	Wear safety glasses with side shields (or goggles).	
Skin and body protection	Wear protective gloves and protective clothing that is resistant to chemical penetration.	
Respiratory protection	No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, a NIOSH/MSHA approved respiratory protection should be worn.	
General Hygiene Considerations	Wash face, hands and any exposed skin thoroughly after handling. Wash contaminated clothing before reuse.
